Seminar on
 "Manufacturing Industry 4.0 / ERP / MES / Industrial IoT"

Through the Top Technology,
 Manufacturing can Achieve the Most Efficient
 Production Planning and Scheduling, Making Fast and
 Wise Decisions by Consolidating real-time
 Information with Mobility

Date : 22 Mar 2019 (Friday)
 Time : 2:30pm - 5:00pm
 Venue : FHKI Conference Room

The manufacturing industry has faced the challenges of dull or excessive materials due to unsynchronised raw materials and output. Moreover, it is difficult for management to make quick and wise decisions as the production data is not captured in real-time.

Through the top ERP/MES/Industry 4.0/Industrial IoT, manufacturers can make the best use of resources through intelligent production, real-time and accurate data to effectively monitor the production, ultimately help factory reduce waste and maximise capacities. Manufacturers can also consolidate real-time information with mobility solution, thus quickly response to the market. In view of this, top ERP/MES/Industry 4.0/Industrial IoT technology will be introduced to achieve the most efficient production planning and scheduling in order to make quick and wise decisions by real-time information.
